**HOW DO YOU  
STAY UP TO DATE?**

If you use any of the listed devices, updating your software is one of the simplest ways to protect yourself online and get the most life out of your device.

Devices That Need Updating:

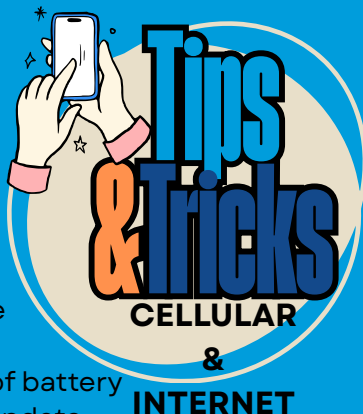

- ☐ Smartphones (iPhone, Android)
- ☐ Computers and tablets
- ☐ Web browsers like Chrome or Safari
- ☐ Smart TVs, streaming devices
- ☐ Even some printers and smart home gadgets!

Why Updates Matter:

- ✓ Block hackers and scams
- ✓ Fix problems and glitches
- ✓ Add helpful new features
- ✓ Keep things running smoothly

How to Update:

- 🔧 Go to "Settings" on your device
- 📶 Connect to Wi-Fi
- 🔋 Plug it in so it doesn't run out of battery
- ✓ Follow the steps to install the update

Important:

- ⛔ Don't trust pop-ups or emails that ask you to "click to update." Always go through your device's official settings.

If you have our Managed WiFi service including any WiFi extenders or set-top-boxes you have one less thing to worry about since we automatically take care of these for you.
