

# Brooke Telecom News

June 2019

Summer is here (finally!) which means more time is being spent outside by the fire pit or on the back deck with family and friends. Extend your wireless signal to those areas by pairing a Node to your Brooke Telecom Managed WIFI.

A Node is a wireless extender that can boost the range of your managed WIFI service. You can place it in the window or even bring it outside with you but don't forget it out there! The Node works seamlessly with our Managed WIFI service and is fully supported by Brooke Telecom.

Note: The extended range available may vary by location of your Managed WIFI.

NODE \$4.00/mth

MANAGED WIFI \$5.00/mth

## Congrats Grads, We Have A Sale For You!

- |                |  |
|----------------|--|

# CRAVE TV JUST GOT A WHOLE LOT SWEETER!!

Months ago we added Crave to our **Mega Movies** channel package. What you have been enjoying and binge watching the last while is about to get better! All the online app content will be slowly added and available to view through our Video On Demand service.

This means hundreds of movies will be available at the simple click of a button...all for only **\$17.50/mth!**

Keep checking back frequently as we continue to add more content in the coming months.

## TIPS AND TRICKS:CELLULAR DATA/WIFI

1. If you do not need to use your data, always keep it turned off
2. Set your phone to automatically connect to your home Wi-Fi network when you come home
3. IF POWER GOES OFF IN YOUR HOME AND YOUR DATA IS TURNED ON, YOU WILL BE USING CELLULAR DATA IF YOU USE YOUR PHONE
4. If your phone has issues receiving a Wi-Fi signal at certain places in your home, consider adding a Wi-Fi Node to give you complete home Wi-Fi coverage
5. Periodically check your WiFi data icon to ensure you are using WiFi and not Mobile Data. 
6. When in doubt, contact Brooke Telecom at **519-844-2160** or visit our stores in Inwood, Watford or Petrolia to have your questions answered

Construction season is in full swing now at Brooke Telecom. Our techs are busy continuing to bury and hook up fibre optics to our local community. On-going maintenance and upgrades are being done as well to ensure optimal service.

This year we welcome our summer help, Luke Leitch, to the crew. Luke lives within the Brooke Telecom serving territory and its proving to be a big asset to our construction crew!

Just a reminder before you dig, please call Ontario One Call to get locates. No one enjoys disrupted services or an expensive bill for repair!
