November 2019

Have you seen our website lately? We now have all the current devices available to view at your leisure!

Important Update: Change to Roam Better Features

As of November 6, 2019, the daily rate for the Roam Better-with 100MB feature will increase from \$7 to \$8 per day when roaming in the U.S, and from \$11 to \$12 per day when roaming internationally.

Also starting November 6, 2019, the Roam Better-with home data feature will include max download speeds for up to 500MB of data usage per day. Beyond 500MB, speeds are up to 512kbps for the rest of the day. Data speeds reset at 12:00AM(EST) daily.

As a reminder, the daily rate charge is only when you use your service while roaming.

In compliance with new regulations mandated by the CRTC to reduce unwanted nuisance calls, Brooke Telecom will implement universal network-level call blocking ("UCB") beginning January 2020 on its wireline network, for all incoming voice calls. As per CRTC's directives, UCB will block calls where the caller identification (i)exceeds 15 digits, or (ii)is malformed and does not conform to a dialable number for calls initiated under the North American Numbering Plan. The CRTC ruling 2018-484 can be viewed here: <https://crtc.gc.ca/eng/archive/2018/2018-484.htm>

Truly Unlimited Internet with Brooke Telecom

Lots of providers have come out with Unlimited Internet lately that isn't actually unlimited. They have put in their fine print that you don't pay overage charges but your data speed is throttled.

Brooke Telecom, from the very beginning, has always been UNLIMITED INTERNET. No throttling, no overage charges; TRULY UNLIMITED.
