

2025 Member Appreciation

What an amazing day!!

None of this would be possible without each and every one of our valued members and of course the Inwood 150 Committee for letting us be part of this!

Tuesday, July 1**

Take Your Connection Outside This Summer

Introducing our new **OUTDOOR
Managed Wi-Fi Service**. On the
patio, by the pool or out by the fire,
our outdoor U4hm unit will keep
you connected.
Call or Click for more details!!

We have put together a few
really great features that are
available to all of our BTV
customers. Some, you may know,
others may become your new
favorite!

Using the Search feature

On the Home Menu, by clicking on Search you can type
the name of any show, movie or actor and it will give
you all the available channels and times as well if it is
available On Demand.

Favorites Guide

Did you know that you can save your favorite channels
to your Favorites on the Home Menu, as well as a
Favorites Guide. When you access the standard Guide,
press the left arrow button on your remote and click on
Show only my favorites.

On Demand

On the Home Menu if you click On Demand you will
have access to a large number of shows and movies.
Any time you want.

and Don't Forget ...

Watch Live...watch it as it is being aired.
Restart... start the program from the beginning.
Catch Up... go back up to 72hrs and watch.
Record... record it now and watch it later. (CloudPVR
subscription required)

Get ready for summer with our **FREE CommandIQ app**. Take Control of Your Internet this summer!! Top 6 Ways CommandIQ makes life easier!

1 See who is on your network.

*View all connected devices
and be notified when
someone new connects.*

2 Run a speed test

*Internet running slow, run a
test. This is the first place to
start.*

3 Get web threat alerts

*Be notified when threats are
blocked and you can take
action.*

4 Hit the pause button

*Set time limits, schedules,
block content and just
pause connection.*

5 Prioritize what matters most

*Choose which devices and
activities get the most
bandwidth.*

6 Check you Wi-Fi Strength

*Check specific devices for
strength to avoid low
performance.*
