

LET THERE BE FIBRE !

We are so happy to announce that CONNECTION has been made. SWIFT Fibre to the Home has had its first full-service install.

Doesn't that Install van look great in that driveway?!

We received great feedback from our customer, who is so pleased with the whole process. The yard is perfect, to the point you wouldn't even know we were there. The vault that has been installed at the road is clean, sleek, and easy to work around.

The Conduit pipe and fibre box on exterior of the house is barely even noticeable.

In the basement where the ONT and battery backup were installed, it fits cleanly on the wall (this is one of the many versions of the set up).

There was a house of smiles when we left, with the plan to watch Netflix without the buffering for the first time EVER!
